RE: Five Star Recommendation for IRM, Inc.

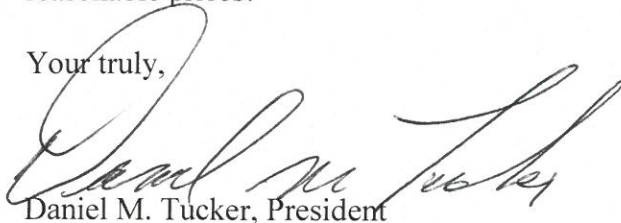

My company, Chlorine Genie, Inc., was experiencing problems with our plastic molded tanks (cabinets) leaking. We used fiberglass tanks for a short while but were not satisfied with those either. One day, I accessed the internet and found IRM, Inc. The idea of roto-molding intrigued me so I called IRM and was directed to Dan Humphries, President. I had no knowledge of the roto-molding process. Dan was very helpful on the telephone and suggested I travel to Madera to see the process. He also told me to bring some of the leaking tanks with me so he could see if he could determine the cause of the leaks.

My trip to Madera was extremely helpful. Dan spent considerable time with me and was able to show me the reason for the plastic molded tanks leaking. I had sent leaky tanks back to my molding company and they could not give me a reason for the failure which was very frustrating. Dan showed me where the molder had used plenty of material but the plastic molding process he used left a very thin layer of plastic in the corners which allowed cracks after two or three years. Dan explained the advantages of the roto-molding process and assured me that the roto-molded tanks would not crack because the material would be distributed evenly throughout the mold. I was totally impressed.

After meeting Dan and hearing his recommendations, I hired his mold maker (Ventura) to make molds for my company. I found both Dan and Ventura wonderful to work with. We made several small adjustments to the mold and both Dan and Ventura were most helpful and accommodating. Their advice and suggestions were very valuable to me. I have since had IRM make several hundred roto-molded parts for my machine and have been 100% happy with their advice, product and pricing.

I would highly recommend IRM, Inc. and would encourage anyone looking for such a product to give them a call if you are after quality, ease of communication, timely delivery, honesty and reasonable prices!

Your truly,

Daniel M. Tucker, President
